Education

Thapar Institute of Engineering and Technology

Aug. 2025 – May 2029

Bachelor of Technology in Electronics and Computer Engineering

Patiala, Punjab

Relevant Coursework

- Data Structures
- Algorithms Analysis
- Artificial Intelligence
- Systems Programming
- Software Methodology
- Database Management
- Internet Technology
- Computer Architecture

Experience

Backend Systems Developer (Freelance)

2025 – 2026

Minecraft Server Infrastructure

- Optimized backend systems to support higher concurrent player capacity, improving overall server throughput.
- Identified and resolved performance bottlenecks to enhance server stability and reliability under heavy load.
- Implemented scalable architecture improvements to reduce latency and accommodate future growth.

Discord Bot Developer (Freelance)

2025 – 2026

Community Management Platform (1,000+ Users)

- Built and deployed a scalable Discord automation bot serving a community of over 1,000 active users.
- Implemented moderation, role management, and user automation features to streamline community operations.
- Designed modular, extensible architecture ensuring long-term maintainability and high performance.

Projects

TIET Timetable | *Go, React* | github.com/DivyeshMangla/tiet-timetable

2025

- Built a full-stack application that converts raw Excel-based college timetables into a clean, readable interface.
- Designed backend processing in Go to parse and transform structured spreadsheet data efficiently.
- Developed a responsive React frontend for improved usability and visual clarity across devices.
- Deployed a production-ready version for live usage by students and faculty.

Distributed Recovery Engine | *Go* | github.com/DivyeshMangla/distributed-recovery-engine

2025

- Built a distributed system capable of automatic failure detection and self-recovery without human intervention.
- Implemented inter-node communication and crash recovery mechanisms for resilience under adverse conditions.
- Focused on correctness and reliability under node crashes and network partitions in distributed environments.
- Stress tested at ~500 nodes with stable recovery and sustained fault tolerance across failure scenarios.

Technical Skills

Languages: Go, Python, Java, JavaScript, HTML/CSS, SQL

Frameworks & Libraries: React, Discord.js

Developer Tools: Git, GitHub, VS Code, Linux

Concepts: Distributed Systems, Backend Architecture, REST APIs, Concurrent Systems

Leadership / Extracurricular

Microsoft Learn Student Chapter (MLSC)

Sep. 2025 – Present

Executive Member

Thapar Institute of Engineering and Technology

- Contributed to organizing a 24-hour inter-college hackathon, coordinating logistics across multiple teams.
- Managed participant coordination and on-ground operations to ensure smooth event execution.
- Assisted the core team in event planning, scheduling, and day-of execution for a large-scale technical event.
